## **APPLICATION FOR CHEMIST AT AGET**

Hi I was told about you thro a friend from Greece and got very interested. My name is Valentine Hamilton and I am 47 years old and I am currently living in Athen but I originate from Sweden and I am working as a teacher in chemistry at the Swedish school in Athens. I felt like it was time for something new since i have been doing this for some time now. Since I have a deep understanding for both chemistry as well as the greek language I won't have any problem to install myself and get right to work. I am a very plight person and a very god coworker swell as very ambitious and I always get the job done.

I studied chemistry at Sorbonne France for four years so I have also a deep understanding for the French language so I will be able to be able to work tighter with other scientist from other countries.
